

## Meet Kathryn

The origin of many systemic diseases can be found in periodontal disease.

Kathryn Gilliam's interest in the medical side of dentistry led her to years of advanced study into the oral-systemic link, including graduating from the prestigious Bale Doneen Preceptorship. Her company, PerioLinks, LLC, was born out of her desire to train dental teams to transform their practices to care for the total health of their patients through comprehensive periodontal treatment.

Rates of oral cancer continue to increase, yet only 14% to 18% of dental offices screen for oral cancer.

Kathryn has been on the front lines of early detection of oral cancer throughout her career. Kathryn teaches an elegant and thorough head and neck cancer exam that both relaxes patients and raises their awareness of the importance of regular cancer screening. She is an active volunteer for The Oral Cancer Foundation and Oral Cancer Cause.

Kathryn delivers impactful presentations to both small and large groups across the country and internationally. She is a graduate of the Lioness Principle Advanced Transformational Trainer and Inspirational Speaker programs. She has published continuing education courses for ineedce.com and Dr. Bicuspid.com, and Kathryn's articles have been featured in: *The Journal of the Academy of General Dentistry, AGD Impact, Dental Economics, RDH Magazine, Dentistry Today, and Modern Hygienist.*

Additionally, Kathryn is a member of the American Academy of Oral Systemic Health and is a member of the board of the Houston Component of the Oral Cancer Foundation. She is also a member of the Speaking Consulting Network and Directory of Dental Speakers.
