Meet Kathryn

A clinical dental hygienist, consultant, author, and educator, Kathryn is an exuberant and dynamic speaker with an engaging presentation style that reflects her love for patient care. Kathryn is passionate about empowering dental professionals to elevate their practice standards and enhance their patient connections and trust.

Kathryn's impactful continuing education courses leave her attendees with a clear path to professional transformation, enhanced career satisfaction, and proven, lucrative systems. Kathryn's content is based on the most current scientific research and is rich in real-life, easily implemented practical protocols. She lectures on compelling topics and creates inspirational and well-received presentations for study clubs, and state and local dental associations.

Kathryn's thirty years of clinical experience and practice coaching have provided her with the experience and ingenuity to guide teams to exceed patient expectations and propel them to maximize growth and prosperity. Kathryn has the expertise to teach dental professionals to master effective communication skills that inspire patient confidence, increase treatment acceptance, and maximize productivity.

Kathryn's interest in the medical side of dentistry led her to years of advanced study into the oral-systemic link, including graduating from the prestigious Bale Doneen Preceptorship and earning her Fellowship in the American Academy for Oral-Systemic Health.

Kathryn is a graduate of the Lioness Principle Advanced Transformational Trainer and Inspirational Speaker programs. Her articles and continuing education courses have been published in numerous professional journals.

Hot Stuff: The Fire Within

Explore the science behind the oral-systemic connection. Integrate salivary diagnostic testing, implement the latest adjunctive therapies, and master effective communication skills to educate patients for improved case acceptance. Understand nutritional needs of periodontal patients, review the anti-inflammatory diet, and identify targeted nutritional supplements.

Three Minutes to Save a Life

In this interactive workshop, distinguish the risks of oral cancer and recognize those people at highest risk. Master a spa-like, comprehensive examination to set your practice apart. Review protocols for the management of cancer treatment side effects. Acquire verbal skills to enhance patient education, increase acceptance, ease patient concerns, and maximize patient follow up.

– that of an oral wellness specialist.

Kathryn's newest course!

The Celiac Surge: Oral Signs of a New Epidemic

At least 3 million Americans are living with celiac disease – and 97% of them are undiagnosed. Silent damage to health could be occurring with every meal.

Recognition of the oral manifestations of celiac disease may be the key to discovering this devastating disease in patients whose symptoms are less evident.

In this course you will become familiar with the various signs and symptoms that may be pointing to this serious systemic illness.

Helping patients understand that they may have gluten-related disorders could be the key to a lifetime of improved health.

Hot Stuff: The Fire Within

Periodontal pathogens and inflammation have devastating effects on systemic health. Learn how dental professionals save lives by transitioning traditional dental practice to whole health care.

Periodontal disease contributes to many catastrophic systemic illnesses, such as diabetes, cardiovascular disease, Alzheimer's disease, and rheumatoid arthritis. Dental professionals can impact patient wellness by utilizing a medical model of care in the diagnosis and treatment of periodontal disease. Elevate the professional identity of your practice while increasing personal and professional satisfaction in your team! Create a wellness-centered practice with an informed team that inspires confidence in patients, improving both the overall quality of patient care and practice financial health.

In this comprehensive, fast-paced course, explore the science behind the oral-systemic connection and survey systemic diseases associated with periodontal disease. Identify how to integrate diagnostic testing into the practice, implement adjunctive therapies, and compare home hygiene options. In addition, examine medical conditions, such as diabetes and cancer, that affect dental treatment, and learn how to manage medically compromised patients.

Suggested Audience: Dentist, Hygienist, and Team
Suggested Format: Full or Partial Day; or Two-Day Workshops

Course Objectives

- Comprehend the role of keystone bacteria and inflammation in periodontal disease and its effect on systemic health
- Illuminate the significance and challenges of oral biofilm
- Discover how medical wound care protocols can be utilized in the treatment of periodontal disease
- Recognize systemic health problems within the dental maintenance appointment
- Explore leading-edge techniques and technologies to enhance periodontal treatment
- Learn the screening tools used to determine the extent of periodontal infection and genetic risk
- Elevate communication skills to educate and engage patients in their health choices and treatment considerations
- Hone communication techniques for sharing screening information and coordinating treatment recommendations with physicians
- Specify nutritional supplements and diet recommendations to address periodontal inflammation and support the immune system

Three Minutes to Save a Life

Yesterday's protocols don't work for today's oral cancer

Rates of oral cancer continue to increase while other cancers are declining. Dental professionals know the importance of early oral abnormality detection, but many lack confidence in knowing exactly what to look for and how to discuss concerns with patients. Caring

for patients undergoing cancer treatment creates additional uncertainty for dental clinicians.

In this interactive workshop, Kathryn Gilliam emphasizes the importance of early oral cancer detection and caring for cancer patients in the general dental office. Distinguish cancer risks including tobacco, alcohol, and the Human Papilloma Virus, and recognize those people at highest risk. Learn how to perform a spa-like, comprehensive examination when screening for head and neck abnormalities, setting your practice apart. Explore elegant and effective verbal skills to enhance patient education, increase acceptance, ease patient concerns, and maximize patient follow-up with specialists when needed. Identify various lesions and review the terminology needed to accurately describe them. Learn the benefits of fluorescence to enhance cancer screening. Review various protocols for the management of xerostomia, mucositis, nutritional deficiencies, and other common cancer treatment side effects. Being able to offer effective regimens and real comfort to patients will create immense professional and personal satisfaction.

Suggested Audience: Dentist, Hygienist, and Team
Suggested Format: Full or Partial Day Workshops

Course Objectives

- Acknowledge the importance of early oral cancer detection and develop a philosophy of care
- Highlight risk factors including alcohol, tobacco, and HPV
- Review available early detection devices
- Learn and practice extra- and intra-oral examination techniques
- Know how to explain the screening process and skillfully verbalize your findings with the patient
- Learn how to identify and utilize the correct terminology to accurately describe lesions
- Discuss cytology, biopsy, referral, and follow-up protocols
- Gain techniques for the management of the side effects and oral manifestations of chemotherapy and radiation

The Celiac Surge: Oral Signs of a New Epidemic

At least 3 million Americans are living with celiac disease – and 97% of them are undiagnosed. Silent damage to health could be occurring with every meal. Dental practitioners can improve patients' quality of life and longevity by recognizing oral signs of this devastating disease.

Celiac disease is a serious autoimmune disorder in which the immune system of genetically predisposed people mounts an attack in response to gluten, a protein found in grains and products made from grains such as processed foods, medicines, and cosmetics. This immune system response results in destruction that can affect multiple body systems.

Left untreated, celiac disease can result in serious systemic complications by injuring the small intestine and reducing its ability to absorb nutrients. In time, the damage may escalate to skin rashes, lactose intolerance, infertility, bone weakness, and nerve damage.

Recognition of the oral manifestations of celiac disease may be the key to discovering this devastating disease in patients whose symptoms are less evident. In this course you will become familiar with the various signs and symptoms that may be pointing to this serious systemic illness. Helping patients understand that they may have gluten-related disorders could be the key to a lifetime of improved health.

Suggested Audience: Dentist, Hygienist, and Team
Suggested Format: Full or Partial Day Workshops

Course Objectives

- Discover the cause, extent, and consequences of celiac disease
- Identify sources of gluten and how gluten affects sensitive individuals
- Understand other possible causes of gluten sensitivity
- Recognize the oral manifestations of celiac disease

“Kathryn presents advanced concepts with expertise and she makes complex ideas clear and easy to understand. I highly recommend her courses.”

What's Being Said About Kathryn's Programs

"Inspiring...Engaging...So many pearls...."

"Kathryn has a thorough grasp of the critical role oral health plays in arterial wellness. Her presentations illuminate the link between periodontal disease and arterial inflammation, as well as how inflammation can be extinguished by managing and eradicating periodontal disease." — **Bradley F. Bale, M.D., Cofounder of the Bale/Doneen Method, Medical Director, Heart Health Program Grace Clinic, Adjunct Professor School of Nursing, Texas Tech Health Sciences Center**

"It is my honor to recommend Kathryn Gilliam for speaking and consulting services. Kathryn possesses a robust range of dental knowledge and experience and is deeply committed to making a difference in the health of our patients and our practices. Her command of the oral systemic science and her ability to express herself in a professional manner is exemplary. She is a polished speaker with content that is timely and inspiring." — **Lisa Marie Samaha, DDS, FAGD; Founder and Instructor PerioPassion Dental Seminars / Perio Arts Institute**

"Kathryn Gilliam is a truly remarkable hygiene clinician, industry leader, and inspiring speaker! She is passionate and knowledgeable about the oral systemic link, it's effect on patient's lives, and our ability to influence patient's health and well-being. One of the best speakers I've heard on this topic!" — **Katherine Eitel Belt; Speaker, Consultant, Author**

"Kathryn Gilliam is the ultimate expert on oral cancer and how to help oral cancer patients. Her expertise and passion are evident in her presentations. She is fun and easy to work with. If oral cancer is your topic of interest, Kathryn is your only choice for a top speaker."

— **Janet Hagerman; Speaker, Author, Coach**

"Kathryn is passionate and knowledgeable about oral health care and she is at the forefront of the oral- systemic movement. Her presentation was informative and entertaining. Our organization will happily invite Kathryn back again and again." — **Jessica Smith, RDH, BS; Vice President, Greater Baton Rouge Dental Hygienist Association**

"Kathryn does a great job of incorporating information that is accurate and useful in your everyday life. You will not be disappointed with Kathryn at the front of the room!" — **Ryan D. Rutar, RDH BSDH, MA, President-Elect, Nebraska Dental Hygienist's Association**

"I just wanted to thank you...in 2018 I attended your course at the Oregon dental conference about oral cancer screening. I'll admit since graduating from dental hygiene school I had not been the greatest at doing my cancer screenings. Your course reminded me just how important it is. I made it a point to provide this service for every patient since listening to your lecture. In October I found a swollen lymph node in the neck of one of my patients. I asked him to see his MD if it didn't go away within 2 weeks. Today I discovered he listened and undoubtedly he has cancer. As sad as that is I'm grateful that I was able to help him find it sooner. Thanks for reigniting my commitment to my patients with oral cancer screenings!" — **Kayleigh Trombly-Krall, RDH**
